

FUNNEL TABLE

Design: Bevk Perović Arhitekti

Table lamp

The lamp's design owes its form to the funnel, a highly typical household object, something all our grandmothers used in their kitchens, bottling and decanting wine, olive oil and similar throughout their lifetimes.

While a familiar object it's also been transformed into a new one, hanging above the kitchen or dining table as a recognizable, iconic light source - a small funnel that serves as a ceiling rosette, a large one casting light onto the horizontal surface below.

The same elements are further transformed into table and floor lamps, with a large pivoting funnel shade that allows for specific directing of the light.

A tube-like ray of light projects up and out of the top of the shade, creating a playful dot on the ceiling or neighbouring walls.

Year of design: 2010

Material: aluminium, steel

Colours: white

Specifications

Light source	E27 / 1x 53W halogen saver included 1x 20W fluorescent - CFL (not included)
Code	V05014 5201
Typology	table lamp
Light emission	direct adjustable
Class	⊕
Installation	▽
IP rating	IP20
Certificate	CE
