## CONCEPT

New MONA table lamp. The remarkable futuristic design and fragile beauty of hand-blown glass in the MONA collection by renowned Czech designer Lucie Koldová are being taken even further in a new table lamp concept. The LED light intersects the body of the lamp, which is formed by interfused glass. The author's idiomatic style, which is evident in the novel combination of wood, textile, and glass, and the precision workmanship are best enjoyed up close – on your table.
